Tire Care Guide

MOMS Mobile Oil Change - Tire Safety and Longevity Basics

Weekly habits

- Check cold tire pressure against door-jamb specification.
- Look for sidewall cuts, nails, bulges, and uneven wear.

Mileage-based service

- Rotate tires every 5,000 to 7,500 miles unless otherwise specified.
- Perform alignment check if steering pulls or wear is uneven.
- Balance tires when vibration appears at highway speeds.

Replacement planning

- Replace tires below 2/32-inch tread depth for wet-weather safety.
- Match tire load/speed rating to manufacturer requirements.
